What the data shows:

- **Peak season hurts everyone.** On-time delivery drops from about 86% (Jan–Oct) to about 72–73% in Nov–Dec.
- **East Hub is the biggest problem.** It handles 16.7% of orders but causes 31.0% of late ones. It takes about 57 hours to ship weekend orders versus about 30 on weekdays, because there is no weekend cover.
- **CargoLine fails at peak.** It is the cheapest carrier, but its on-time rate falls from about 86% to about 43% in Nov–Dec while the other carriers barely move.

Recommendations:

- Add weekend cover and temporary peak staff at East Hub. *Fixes the largest share of late orders.*
- Reduce CargoLine's share in Nov–Dec and shift volume to SwiftShip or PrimeFreight. *Costs more in shipping, protects the on-time rate.*
